Test Cases

Form Tests 8

This section contains manual test cases dedicated to the “Contact” form functionality. It verifies proper rendering, input validation, error handling, and successful submission behavior. These tests ensure the user can interact with the form as expected, including edge cases such as empty fields or invalid formats.

ID	Title	Test Labels	Assigned To	Status
T66	Valid contact form submission		Anna B.	
T67	Submitting an empty contact form		Anna B.	
T68	Invalid email		Anna B.
